Pasteurella multocida

Bacteria: Proteobacteria; gamma subdivision; Pasteurella.

Pasteurella.

I (bases 1 to 2919)

Fuller, T.E., Kennedy, M.J. and Lowery, D.E.
Identification of Pasteurella multocida virulence genes septicemic mouse model using signature-tagged mutagenesi.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            21;

On Jul 17, 2001 this sequence version replaced gi:12746529.

* NOTE: This is a 'working draft' sequence. It currently

* consists of I contigs. Gaps between the contigs

* are represented as runs of N. The order of the pieces

* is believed to be correct as given, however the sizes

* of the gaps between them are based on estimates that have

* provided by the submittor.

* This sequence will be replaced

* by the finished sequence as soon as it is available and

* the accession number will be preserved.

* This sequence as soon as it is available and
